

It's a serious problem. Eliminate it.

Product Guide

Clinic | Shelter | Groomer | Kennel | Home

EVERY IMPRESSION COUNTS. DON'T TAKE A CHANCE WITH BAD ODOR.

Animal Odor

Unpleasant animal-related odors are a common, daily occurrence, and managing them safely and effectively is an important part of keeping your work environment pleasant, your clients satisfied, and your pets happy.

Animal Zone

(kennel, grooming, dog & cat ward)

In the Animal Zone, feces, urine, and emesis are just a few of the common odors present. Managing odors in this zone is key to sending your patients home in optimal condition.

Staff Zone

(laundry, laboratory, conference room, pack/scrub & treatment area)

Working in an environment that is dedicated to helping pets live long and healthy lives can be very rewarding. It also has its drawbacks and having to deal with ongoing animal-related odors is one of them. Address odors throughout the Staff Zone and make your daily work environment as positive as the results you help create.

Pet Owner Zone

(lobby & waiting area, bathroom, retail, exam room & home)

Keep client retention high and bad perceptions low by effectively addressing odors in this zone. All of Thornell's products are safe for home use as well, so you can retail them and help your clients maintain an odor-free environment at home.

Complete Odor Management

Thornell specializes in creating products that permanently eliminate malodors - complex blends that work through counteraction, absorption, molecular bonding, inhibitors and residual actions. They are NOT masks. They are NOT enzymes.

Each of Thornell's products is specially formulated for a unique purpose.

**NEW
PRODUCT**
